DETAILED ACTION
FIRST ACTION ON THE MERITS

I. ACTION SUMMARY

Claims 1-51 are currently pending in the instant application and are subject to the required restrictions and elections as described below. Claims 1-48 in part and the whole of claims 49-50 are withdrawn under 37 CFR 1.142(b) as non-elected subject matter.

II. PRIORITY

This application claims the benefit of U.S. Provisional Application Serial No. 60/463,542 filed on April 17, 2003 under 35 U.S.C. 119(e).

III. ELECTION

Response to Election

Examiner has acknowledged Applicant's election of Group I, claims 1-48 with traverse and provisional species election of the compound, "Example 3" found on page 49 of the Specification in the Response to the Restriction Letter filed on August 10, 2005. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim that is remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant's election with traverse of the compound of Group (I) in the reply filed on September 16, 2005 is acknowledged. The traversal is on the ground(s) that (1) Group I and (II) both treat cancer and are both classified in Class 514 and should therefore be examined together;

Art Unit: 1626

and (2) that Groups (I) through (IV) utilize the compounds of Group (I) and should therefore be examined together.

The grounds for traversal are not persuasive because first, Group (I) and (II) are distinct for the reasons set forth in the restriction letter; namely that the process of treating cancer can be accomplished with products materially different from the instant invention. Thus, the inventions are distinct for the reasons given above and the search required for Group (I) is not required for Group (II), restriction for examination purposes as indicated is therefore proper. Second, the products of Group (III) are classified in class 250 and are distinct invention (labeled compounds). Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Additionally the method of studying cancer using ^{11}C -labelled compounds and the method of treating a patient comprising the use of the compounds of formula (I) are distinct inventions and would require separate searches. The requirement is still deemed proper and is therefore made FINAL.

Status of the Claims

Claims 1-48 (in part) are currently pending in the instant application. Claims 1-48 (in part) and 49-51 are withdrawn as said claims are drawn to non-elected subject matter. 37 C.F.R. § 1.142(b).

Applicant elected the compounds of Formula (I)

wherein A is (CO)NH₂, R_a is H, R_b is H, Z is C=O, R_c is 0, Q is CH and A is phenyl.

Art Unit: 1626

Thus, the scope of the invention of the elected subject matter is the compound of Formula (I) wherein:

W is COOH, (CO)NH₂;

Q is CH;

Z is C=O;

A is subgroup (a); and

R_a, **R_b** and **R_c** are as described in Claim 1.

The withdrawn and or cancelled compounds as a result of the restriction various formulas representing divergent and distinct compounds. This recognized chemical diversity of the various formulas can be seen by the various classifications in the US classification system. For example, sulfonyl(piperidine) (where Z is SO₂-piperidinyl) is classified in 546/199. Pyridine imidazoles, for example, are classified in 546/273.4. Benzimidazoles are classified in class 548, subclass 310.7. Thus, the subject matter withdrawn from consideration as being non-elected subject matter differ materially in structure and composition and the fields of search are not co-extensive and therefore have been restricted properly.

The compounds withdrawn by way of restriction are the compounds of Formula (I) wherein **Q** is nitrogen, **W** is (SO₂)NH₂ and **Z** is C=CHR, CR_dR_d, CF₂, CR_dOR_c, C(OR_d)OR_c or subgroups (b), (c), or (d); and wherein **A** is selected from subgroups (b)-(i). Applicant's reservation of the right to file divisional applications on the non-elected subject matter is acknowledged.

The remaining subject matter of claims 1-48 in part and 49-51 that is not drawn to the above invention commensurate with the elected species stands withdrawn under 37 CFR §

Art Unit: 1626

1.142(b) as being for non-elected subject matter. The compounds are not within the elected invention, which are independent and distinct from the elected invention and do not have utility with the elected compound and are therefore withdrawn by way of restriction.

IV. OBJECTIONS

Claim Objection-Non Elected Subject Matter

Claims 1-48 are objected to as containing non-elected subject matter. To overcome this objection, Applicant should rewrite the claims in independent form including all of the limitations of the base claim and any intervening claims and if rewritten directed solely to the subject matter indicated as being examinable.
